

# Update - October 2015

## **Analysis of Open Day Feedback Continues**

As we explained in our last update, full analysis of the large amount of feedback received will take some time but we can report that one of the designs has emerged as less popular than the others. Consequently the Steering Group has informed Stonewood Design that we will not be asking them to develop their design further. We are grateful to the practice for their participation and the Village is indebted to them for the substantial amount of work they contributed, free of charge, in preparing their design.

The other [designs can be viewed HERE](#) and there is still time to [add your own FEEDBACK](#)
