

Update – December 2015

Cost Investigations and Preparatory Survey Work

We are continuing our work with the architects to discuss the details of their plans and also to gain an insight into the range of costs involved. To further that aim we have also engaged a cost analyst whose input will be important as we move towards the selection of a design. We are also continuing to investigate funding opportunities, in particular the grants available from central government as part of the Community Right to Build process. Some important preparatory survey work has also been undertaken and we now have the accurate topographical data which is vital for the preparation of detailed drawings. Ecological and archaeological survey work has also started.
