

## Update – May 2016

A very well-attended Update Event was held on 14<sup>th</sup> May which gave villagers the opportunity to view and discuss the latest designs with the architects and the steering group. A lot of feedback was gathered at the event and you can still have your say by clicking [HERE](#). You can also [see the latest designs](#) which have been developed in response to the last round of feedback. The project has now received £54,000 in grants and donations which has been used to meet architects' fees and fund initial surveys. Work is now continuing to produce the bid document which will form the centrepiece of the proposed Community Right to Build Order and engineering consultancies have been appointed to advise on structural, mechanical and electrical aspects of the project.
